**PERFECTLY  
ROUNDED**

Compact rim roller for drinking cups of  
different diameters

## RONDO

A well-rounded thing

# Compact High-end rim roller

The GABLER RONDO was specially developed for crimping the U-edge on drinking cups of different diameters. Even at very high throughput rates, the RONDO always guarantees consistently high crimping quality. The integrated control system enables downstream operation with any thermoforming machine in both inline and offline mode. Thanks to the innovative screw geometry as a 1-flight or 2-flight system, the best possible solution can be offered for any throughput rate.

» Range of cup diameter: **2.36–4.72"**

» Heater output: **10,8 kW**

» Dimensions: **L 71.85 / W 28.35 / H 69.69"**

## RONDO

The compact RONDO rim roller crimps the U-edge of PP, PS and APET cups of different diameters and wall thicknesses. The heating power is automatically adapted to the material to be processed via a temperature controller.

The article infeed/outfeed is infinitely adjustable to cup diameters of 2.36–4.72". A Siemens control with touch panel enables intuitive and convenient operation of the device.

**RELIABLE**

**PARTNER**

A financially sound company, one of the world-market leaders in high end thermoforming technology – with branches all over the world

**COMPREHENSIVE**

**EXPERTISE**

Almost 50 years of experience in thermoforming

**EXPERT**

**SERVICE**

International network of experienced service technicians, rapid help on site, regular maintenance of your plants and fast, world-wide spare parts delivery

**STATE OF THE ART**

**TECHNOLOGY**

Innovations in the fields of pre-stretching technology, tool cooling, machine control, remote support, digitalization, and many more
